

Carmen

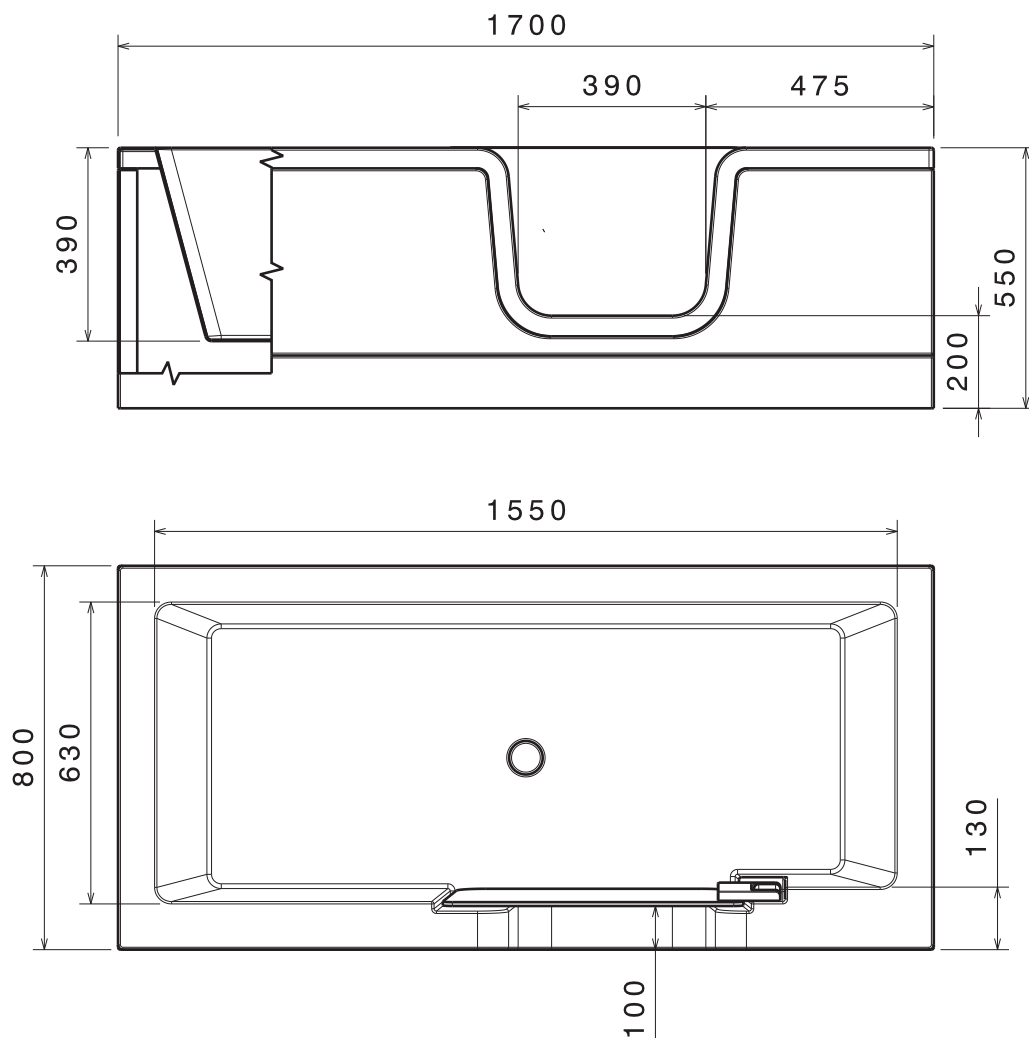

The perfect bathroom has to be a place of relaxation and privacy for everyone. The Carmen bathtub has been designed to rediscover the pleasure of your bathing offering easy and safe access, effortless and to continue enjoying the benefits of a hot bath when you want.

The Carmen bathtub can be equipped with our well-known and reliable hydro and aeromassage systems, being an excellent way to relax after a tiring day. Also, as optional accessories, the Carmen bathtub can be fitted with a glass screen (with or without a towel port) and a safety catch.

Description

Anti-Slip floor

-A three-dimensional bathtub flooring geometry will ensure the adhesion you need to feel safe.

Shower enclosure

-To turn the bathtub into a shower area, you can choose a shower screen (dimensions: 140 x 80 cm).

Safety grip handle (optional)

-Is an option that ensures safe mobility for a worry-free experience.

Composite panel

-You can choose a front panel and / or lateral panels of composite material with different textures and colours.

Secure glass

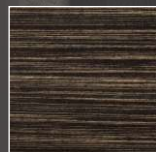

-The door is made of 6mm thick glass and anti-lime treated.

Technic

Zebrano

Natur

Oxide

Red

These masks of different colours or textures are made from composite panels, resistant to water and moisture, conditions that are usually formed in the environment of a bath. The panels form a rigid frame around the bathtub, however access to the technical area is facilitated by the ease of mounting and dismantling.

*For the full range of colours and textures do not hesitate to contact us.
